Evonex
evolution in voice

THE FUTURE OF HOSTED TELEPHONY

With an array of market leading features, the Evonex hosted telephony solution from Switch Medical will give your medical practice the competitive communications edge in today's demanding business world.

SECURE > CALL QUEUING > CALL RECORDING > CRM INTEGRATION > PERFORMANCE STATISTICS

FLEXIBLE, COST EFFECTIVE BUSINESS COMMUNICATIONS

Evonex hosted telephony is the ideal solution for practices of all sizes. Staff efficiency is improved with easy-to-use features and built-in Business Continuity ensures that, whatever the situation, you will never miss a call.

The expansion modules simply bolt on to a compatible handset, allowing it to grow alongside your practice.

Switching couldn't be easier.

We have over 50 years' experience in the communications market with highly professional and experienced teams that deliver first class support and advice throughout the selection, installation and support of your new hosted system. Evonex is perfect for all sizes of medical practices from single sites, to multi-site corporate requirements and of course in any environment home workers benefit from the full suite of functionality as though they were in the practice. Evonex brings all your staff together on a single communications platform with easy to use Directories, Group Voicemails, Fax to Email, Instant Messaging and Presence.

- > Intuitive user portal and call features at your finger tips
- > HD voice and video capability
- > Full compatibility with leading Cisco handsets
- > Flexibility to use an approved range of other popular hosted handsets
- > Strong Hot Desking and Call Park features
- > Conference - 3 party ad hoc and conference bridge
- > Address books see who is calling and Click-2-Dial straight from your contacts
- > See when colleagues are free with Line Monitoring, and transfer calls to any internal or external number easily
- > Functionality that is equivalent to, if not superior than, the leading on premise IP systems

FEATURES & APPLICATIONS

The Evonex platform is a future proof, feature rich, fully supported hosted telephony solution built on highly resilient, patented, super reliable technology that is easy to use and manage. It has a range of market leading applications designed to make your everyday communications experience highly effective in the fast moving world of medical practices.

Business Continuity

Ensure you still get calls even when your connection is down with a failover number activated via the portal, using any device with an internet connection or using a standard telephone connection and PIN.

Hunt Groups & Call Queue Management

Automatically schedule time-based routing plans and personalised messages. Manage up to 50 queues, edit queue durations and volumes, manage what happens next and enable manual override for system administrators to move calls up, down and out of queues.

Manage Contacts

Manage personal and company address books, access call history; inbound, outbound and missed calls and save time with click to call.

Call Recording

Choose what to record; all calls, percentage of calls, inbound / outbound. Calls can be stored for up to 6 months. (Auditable records of call recordings are kept online indefinitely). Authorised administrators can search, playback, download and delete.

Presence & IM

The desktop application enables you to update your presence, add contacts to your directories, add speed dial numbers, and make, answer, transfer, hold and hang up calls. Presence enables you to see who is available and choose how to contact them, for those quick questions needing immediate answers.

Click to Call & CRM Integration

Improve efficiency with screen pops and click to call. Evonex is designed to plug straight into the leading CRM systems and business applications.

Call Management

Manage your calls with the easy to use desktop application which shows your phone activity for the day, so you can always see what calls you need to return, what voicemails you need to listen to and what Instant Messages and alerts you need to respond to.

WALLBOARDS

With Wallboards you can view performance statistics from your desktop or mobile device. They provide an essential insight into your call activity and help you manage the system even when you are away from the practice.

The Evonex wall boards display call statistics across a group of phones, allowing Call Group members to monitor activity and respond to performance issues. Statistics can be displayed on any web-enabled and connected device.

Wall boards provide teams with a view of how they are performing, the number of callers in the queue and past activity, which can highlight when additional members may be required to login to cater for busy times.

- > **Inbound calls - answered calls, lost calls, queued calls and ring duration by group or individual users**
- > **Outbound calls - average duration and maximum duration by group or individual users**
- > **Queued calls - average queue time, maximum queue time, queue limit breaches, timeouts, callers in queue**

Wallboards display near real-time call statistics across a group of phones, allowing Call Group members to monitor and manage call level performance.

HANDSETS

Cisco IP Phone 6851 Budget-friendly, business-grade VoIP

Designed with enhanced affordability in mind, the Cisco 6851 delivers reliable, business-grade audio, Gigabit Ethernet integration and power over Ethernet support. Combining an attractive new ergonomic design with “always-on” reliability and secure encrypted communications.

User Features

- > 3.5” 396x162 pixel Grayscale Display
- > Headset Port
- > 10/100/1000
- > x4 Programmable line/feature keys
- > Ergonomic design

Cisco IP Phone 8841 Voice communications that boost productivity

The Cisco IP Phone 8841 increases personal productivity through an engaging and powerful user experience. The IP Phone 8841 combines an attractive ergonomic design with wideband audio which delivers crystal clear voice communications.

User Features

- > Screen 5” 800x480 pixel Colour Display
- > Headset Port
- > 10/100/1000
- > x10 Programmable line/feature keys
