

EXTENSION - STANDARD

Including a Yealink T21P, the Standard Extension is perfect for those staff members who are not handling the main appointment calls.

Whether stationed in GP consultation rooms, the admin department or secretary team, the Standard Extension offers ease of use combined with the flexibility to suit a number of roles within your surgery.

CHOOSE YOUR FEATURES

We understand that different roles within your surgery will often have distinct requirements from a telephone. The Standard Extension has 6 configurable keys allowing each handset to be finely tuned to the user's needs.

Whether the requirement is to broadcast to a PA system in Reception, to speed dial a commonly called telephone number or to set yourself into Do Not Disturb (DND) mode, having the ability to self configure each handset to benefit the working environment increases efficiency and usability. Below are the configurable button options you are able to set.

Features	Description
Busy Lamp(s)	Shows busy status of other extensions, users or distribution groups and allows single key dial or transfer.
Login	Shows call queue information and allows single key log in to reception group or hot desk login from a list of staff names.
Pickup	Allows pickup of a call ringing on another extension in the group.
Speed dial(s)	Single key dialling of one or more frequently used numbers.
DND	Put phone into Do Not Disturb (do not ring) to allow the completion of tasks or to make outbound calls without being targeted by inbound calls.
Page	Broadcast to other phones or via Tannoy system in reception (if available).
Record on/off	Suspend or resume call recording if configured for this user.
Directory	Allow access to the central directory via the telephone.
